**D-13 ASSIGNING ALTERNATE TAC CHANNELS**

- The Communications Center will typically assign only one TAC channel for each of the following incidents: structure fire responses, rescues, Hazardous Material responses, or freeway traffic collisions.
- During major incidents, a second TAC channel may be requested. Dispatch will assign the adjacent TAC.
- If the IC requests additional TAC channels, the TAC channel(s) adjacent to the working TAC channel for the incident should be assigned.
- All wildland incidents will be given two (2) TAC channels for all LRA and MTZ fires.
- For all SRA and FRA fires having multiple TAC channels is subject to availability.
